

FUSEBASE

Production-ready apps in days, not months

AI Coding

AI Agents & Workflows

Team Hub

Portals

1

AI Coding Stops at Production

↳ “Speed without infrastructure creates risk.”

2

No Plug-and-Play AI Workflows

↳ “Complex AI systems require real backend architecture.”

3

Coding Platforms Ignore Collaboration

↳ “Software without execution doesn’t scale.”

The AWS Moment for AI-Native Software

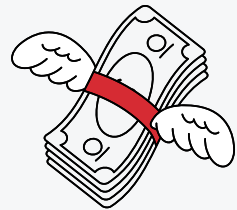

FUSEBASE

Just as Amazon AWS eliminated physical servers, **FuseBase** eliminates complexity for AI-built applications

BEFORE FUSEBASE

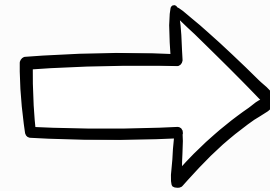

Months of coding & manual setup

Hundreds of thousands in cost

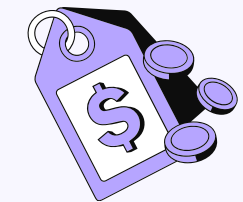

Infrastructure & DevOps maintenance

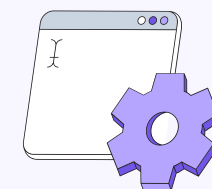

AFTER FUSEBASE

Production-ready apps in days

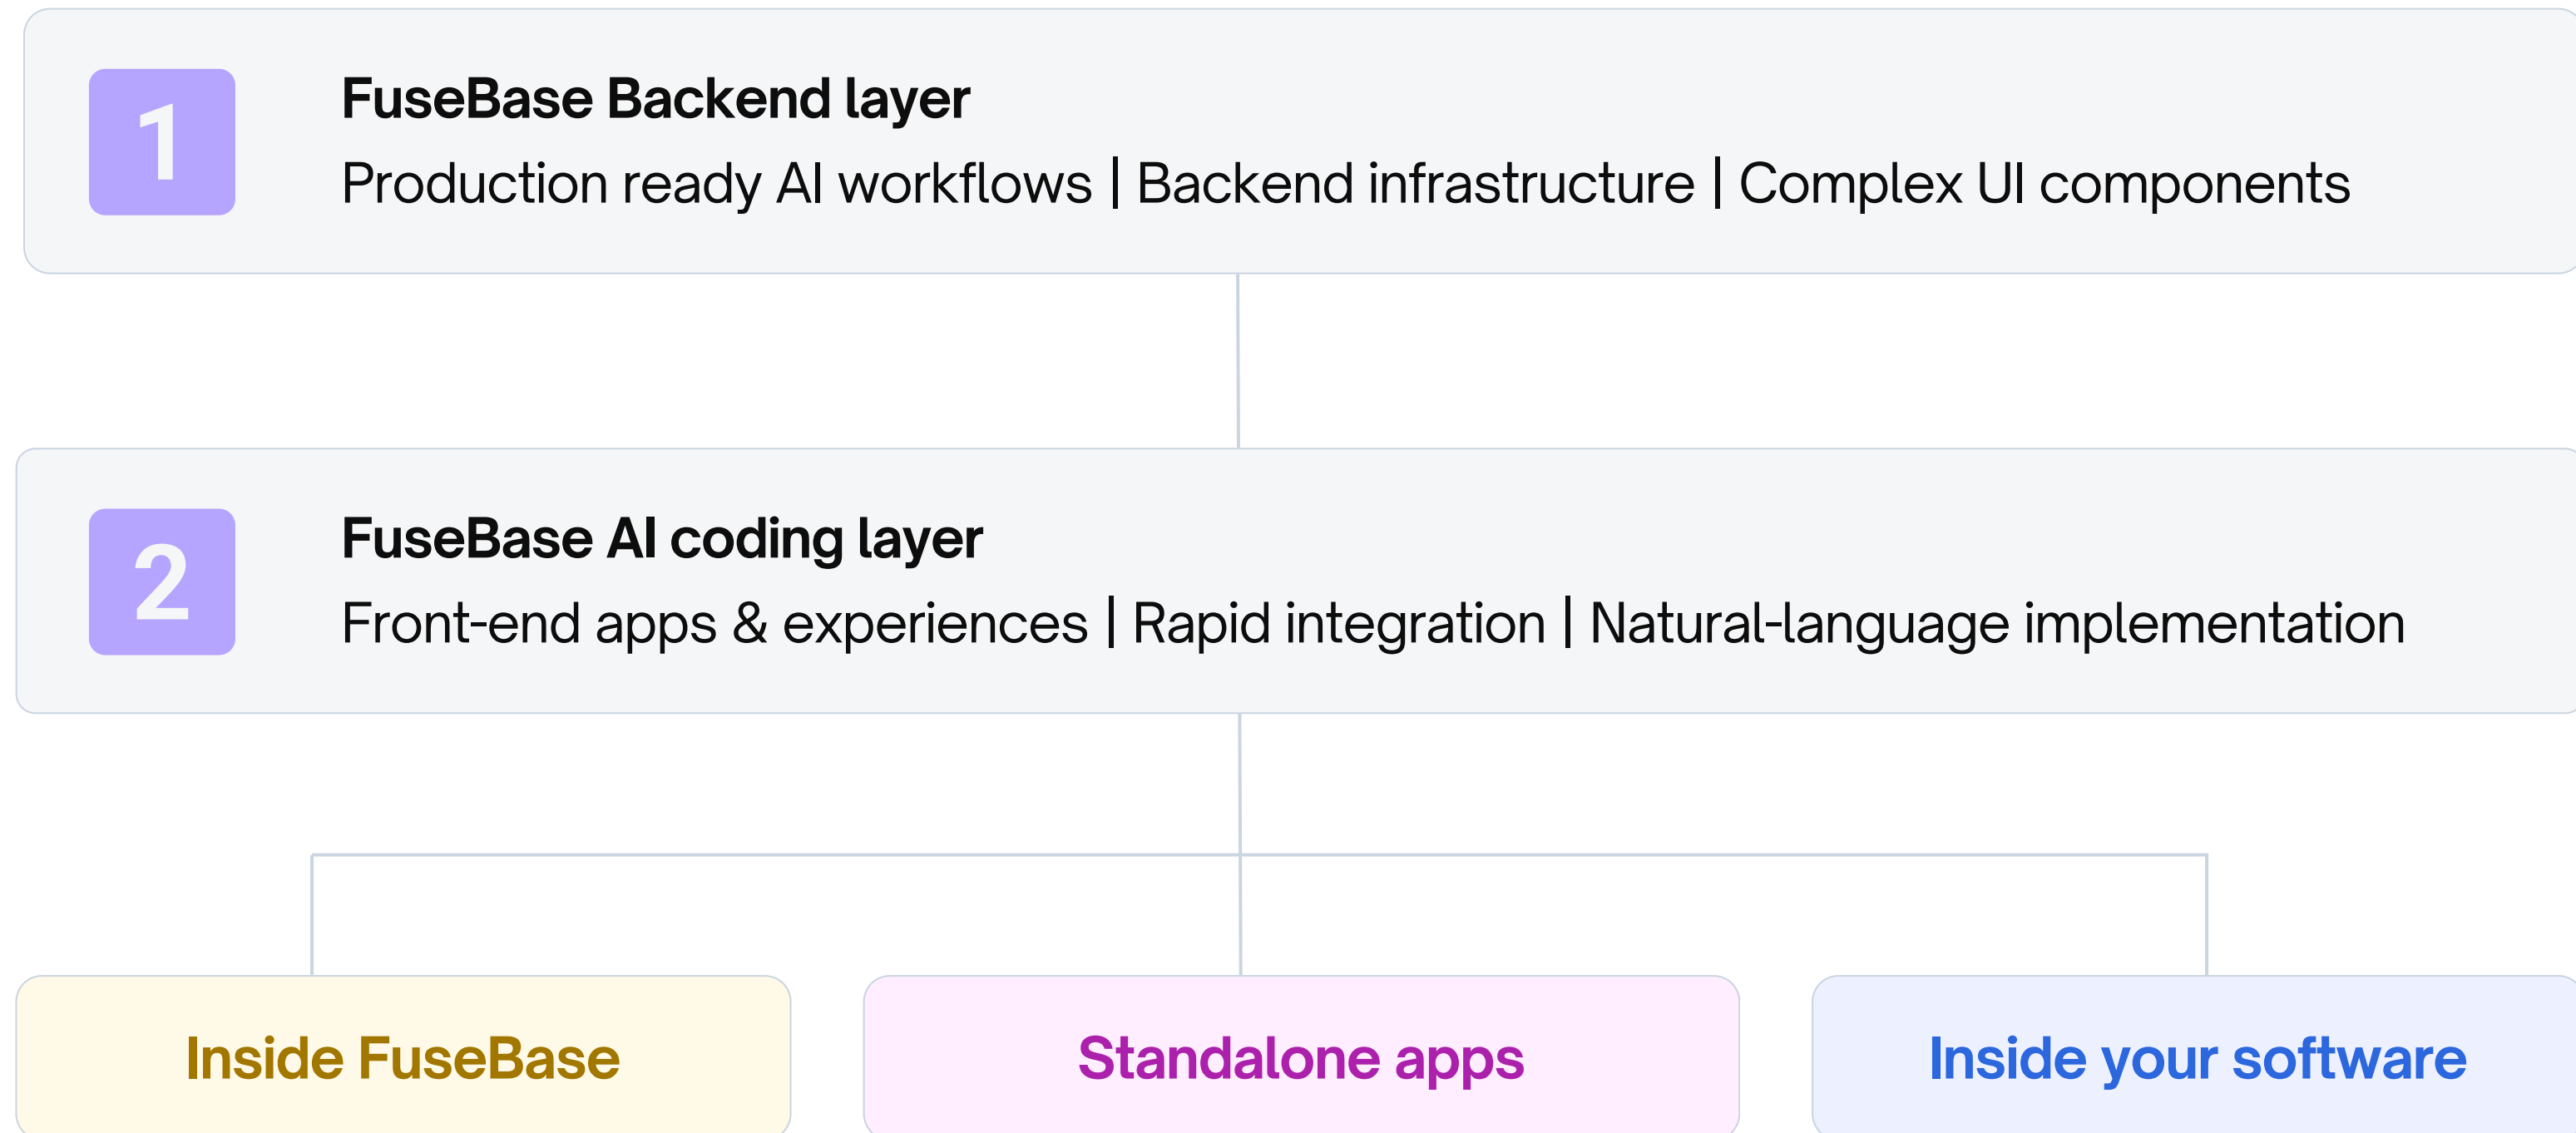

Price of a business subscription

Purely on your ideas & user values

Two-layer system adapts to all business needs

FUSEBASE

Product: secure and production ready

Developing Educational Product Line

We are excited to announce the commencement of our comprehensive product line of educational courses.

To do

- Ensure all course materials, including videos, documents, and assignments, are uploaded to the LMS

In Progress

- Course material creation and review
- Curriculum design

Research and Planning

- Conduct user interviews to gather requirements.
- Define the app's key features
 - Task-creation-and-management
 - Team-collaboration-tools
 - Real-time notifications

Beta test with selected users

Description: User guidance on completing the course and feedback on their experience. Attached below are documents for recording any bugs encountered during testing.

Attaches: Bug Report Tracker

Assignee: Ella Park (product manager)
